DETAILED ACTION

This office action is in response to remarks filed October 14, 2010. Claims 1, 2, 4-9, 11-16, 18-22, and 24-26 are pending.

Response to Arguments

Applicant's arguments filed on October 14, 2010 have been fully considered but they are not persuasive because of the following reasons:

Regarding Claims 1 applicants argued that "comparing the pending claims in this application with the issued claims in the '214 patent it should be apparent that the '214 patent describes a technique based on negative acknowledgements from the receiver as opposed to keep alive messages from the transmitter. Further, the claims of the '214 patent describe a congestion control technique based on changing transmission rate of (non-management) data packets whereas the pending claims recite changing the frequency of keep alive messages (management packets) based on reliability of the receiver. Note that the result of the claims of the '214 patent is congestion control whereas the result of the pending claims is use of failure detection resources commensurate with likelihood of failure. Both sets of claims describe communication between network nodes. However, the recited claim elements and results are fundamentally different. Applicant therefore asserts that the pending claims are patentably distinct from the claim of the '214 patent and respectfully traverses the rejection"

This is not found persuasive because both the system claim subject matter that relates to a system and method for transmitting data in a data communications network, using a transmission

control protocol, to provide reduced and adjusted acknowledgment control traffic, and both the system reduces the acknowledgement traffic generated by TCP and control error recovery and congestion that does not require acknowledgements.

Therefore, the examiner asserts that cited prior art does teach or suggest the subject matter broadly recited in independent Claims and in subsequent dependent Claims. Accordingly, rejections for claims 1, 2, 4-9, 11-14, 22, and 24-26 are respectfully maintained.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
